

Marketing Guidelines

Approved synthetic guidance for grounded campaign creation.

1. Approved audiences

Target only customers with active marketing consent. Exclude absent or withdrawn consent before scheduling.

2. Claims and sources

Every product, price, promotion, date, inventory and outcome claim needs an approved source. Never invent scarcity, savings, quotations or guarantees.

3. Tone

Use clear, helpful and non-pressuring language. Invite learning or staff contact. Do not say an uncertain customer will churn.

4. Channel adaptation

LinkedIn is concise and professional; Instagram visual and accessible; email has a truthful subject; WhatsApp is brief and consented.

5. Approval and publishing

AVO output remains Draft. A Marketing Manager reviews facts and approves the campaign and schedule before Buffer or Demo Publisher is called.
