

Alternate Service Recovery Policy

Customer service and retention governance | Version 2.1

Manager approval is required before execution.

First verified complaint

Acknowledge the issue, capture evidence, and assign an owner within one business day.

Repeated complaint

Create a retention alert and escalate to a manager on the same business day.

Missed staff commitment

Record the promised date and actual state, then propose recovery within four working hours.

Cancellation language

Create a critical review immediately. Do not pressure the customer or invent a refund.

Controlled lifecycle

Draft, Pending Approval, Approved and Ready, In Progress, Waiting for Customer when needed, then Completed. Changes Requested returns to an editable draft.

Outcome test

Recovered requires a recorded customer response and completed remedy. Issue unresolved must escalate and must not lower risk automatically.
