

Alternate Marketing Guidelines

Consent-safe campaign rules | South Healthcare decline test

Audience eligibility is recalculated at preview and execution; withdrawn consent is always excluded.

Calculated opportunity

Group current customers by region and industry. Require at least four customers and preserve the evidence behind the current-versus-baseline comparison.

Decline thresholds

Trigger when affected share is at least 20 percent and spend decline is at least 15 percent. Engagement decline may provide supporting evidence.

Channel eligibility

Email requires active consent and an email address. WhatsApp requires active consent and a mobile number.

Alternate audience test

South Healthcare has six customers. Priya Restricted is excluded because consent is withdrawn. Quentin No Phone is excluded from WhatsApp because no mobile is available.

Campaign provenance

Main navigation opens a blank campaign or list. Starting from an opportunity may prefill only that selected opportunity. Each campaign retains its own approval history.

Publisher truthfulness

Demo Publisher must be labelled. Buffer must be disabled when credentials are absent. Cancelled and published states must remain distinct.
